Re: Letter of Recommendation

Dear Michael:

At RGA, we have come to depend on you and Marfoggia Construction to help us whenever we have a renovation or office construction project. Over the last dozen years you have been there to transform our plans into new realities.

Your superior project management skills, construction management experience, and your desire to resolve issues and concerns quickly in a customer-focused fashion have fostered this long-term relationship our companies share.

During three previous construction projects while our offices were in the Dominion Square Building, your proven abilities to manage the details while keeping your eye on the big picture translated challenging projects into successes.

With these past accomplishments in mind, we entered into the 36,000 square foot relocation and construction project at 1981 McGill College with confidence that once again, we would realize our goals.

We believe you have come to know us very well. That knowledge, together with your dedicated team, your expertise, and the skills and commitment of your people, has ensured yet another success.

Thank you for managing costs closely, respecting critical deadlines and never compromising on quality. Each time we work with you we know that, regardless of how complex or demanding the project may be, you will always protect our interests and deliver "on-time ... on-budget".

The quality of your millwork is truly exceptional and has provided the crowning touch to a job well done. Please pass on our thanks to your entire team for their efforts in creating a great new workplace for our staff.

Sincerely,

Alain Néemeh, CPA, CA
President and Chief Executive Officer
