Re: Marfoglia Team Recommendation

To say that we are content with the level of work Marfoglia has performed on our office space renovations would be a great understatement. The level of professionalism, communicative support, and collaborative problem solving exhibited by their team has far surpassed our broadest expectations.

Although Marfoglia was contracted by an outside design team for our project, they were directly involved with the process every step of the way. We were made to feel welcome contacting them directly to resolve any matter, large or small. Communication and responses were always prompt and courteous.

The finished product garnered the design firm a prestigious award, in no small part due to Marfoglia's efforts and skills. Without Marfoglia's flawless ability to manage the project's multiple subcontractors and stakeholders, this renovation could not have been such a wide success.

We will definitely choose Marfoglia again for future projects, and recommend them widely to anyone seeking professional construction project management and execution.

Sincerely,

Jenny King

Executive Assistant
