

February 22, 2013

Dear Michael:

I would like to take this moment to thank-you for your recent work in the construction of our new offices at 1000 de la Gauchetière. We embarked on this construction project knowing we needed to achieve an aggressive time line. We also knew we did not wish to compromise our objectives.

Our design demanded high-end millwork and finishes, custom furniture and a unique selection of lighting fixtures. These elements add complexity to any project and are often the causes of delays and missed deadlines. Your engaged approach to project and construction management kept this initiative on track. Throughout the project you were able to incorporate numerous changes while maintaining the target delivery dates and a keen focus on the quality of workmanship.

We are thankful for the agility you and your team demonstrated to accomplish this 15,000 square foot build out in the 10 weeks that were available. Our employees are all very happy in our new offices, enjoying the fine walnut finishes and the quality craftsmanship that were produced in your millwork shop.

We appreciate all your efforts and would not hesitate to recommend you or work with you again in the future.

Sincerely,

Michael Tamber
